

DATA CENTER SYSTEMS

Providing Solutions to Critical Problems

PREMIER PRODUCTS. SUPERIOR SERVICES. THAT'S DCSI.

Data Center Systems represents only the best manufacturers in the industry, providing products and solutions that meet the highest level of specification. By partnering with the premier providers of HVAC and mission critical solutions, we are able to offer efficient, reliable, and comprehensive solutions for our customers.

PROUD REPRESENTATIVE OF THE FOLLOWING PARTNERS:

A global manufacturer of power, precision cooling and infrastructure management systems for mainframe computer, server racks, and critical process systems.

Battery Monitoring Systems provide continuous monitoring of UPS batteries to critical battery parameter and automatic testing to verify battery integrity and reliability.

Manufacturer of data rack and server rack enclosures, electronic packaging and custom enclosures for OEM and commercial electronics.

Avocent is the leader in providing innovative software and hardware technology that rapidly helps customers link corporate and IT strategies.

Critical Labs is a monitoring and analytics platform that monitors everything from critical facilities to data centers in one cloud-based web app.

Manufacturer of engineered precision cooling products, including air and water cooled portable units.

Temperature Sensor Monitoring for Server Rooms. Monitor rack temperature and humidity, prevent equipment downtime, monitor and control CRAC power consumption.

Since 1960 American Ultraviolet® has designed and manufactured hundreds of thousands of insightful UV solutions such as UVC germicidal fixtures

Ionization units designed and engineered to focus on producing powerful, pathogen fighting ions where you need it most - the breathing zone.

Over 45 years of expertise in emergency lighting inverters, transformers, medical grade power conditioners, UPS & battery backup, and industrial DC power industry.

Racks and enclosures that feature an extensive selection of rack heights, widths, depths, and styles that target your specific design requirements. Custom designs also available

DATAACSI.COM

Haskris has partnered with OEM customers to support advanced technologies and deliver chillers that meet exacting performance and reliability needs.

IMS Electrol has been a leading supplier of custom cable assemblies, wire harnesses and electro-mechanical assemblies since 1961.

Solutions for today's toughest fire-related challenges. Beyond sprinklers and fire extinguishers – fire protection, detection, and suppression.

Plasma Air bipolar ionization technology is installed in thousands of commercial, institutional, residential and industrial buildings around the world. For over 10 years, we have been providing safe, effective air purification solutions

Manufactures cable trays, power distribution solutions and cost-effective cable management for data centers, solar installations, transit and more.

Subzero Engineering is an industry leader in data center containment and airflow management. We custom design, manufacture and install.

Flywheel systems with ability to capture regenerative energy repetitively that normally would be wasted as heat, delivers significant energy savings and reduced fuel costs while reducing a full range of toxic emissions.

Innovative leader in ultrasonic humidifier technology.

Since 1997, KWIKOOL has become the leading innovator in portable cooling.

Industry leading wireless environment and power monitoring over custom-developed wireless network protocol.

Power Quality International (PQI) manufactures world-class transformers, harmonic filters, and provides power system solutions

Southern Tier Technologies developed a series of surge protection products designed to protect your most critical locations.

Engineered to enhance the efficiency of data centers, airflow management and server room cooling products that do more to save you more.

A Vertiv company that provides independent electrical testing, maintenance and engineering services.

Products that focus on power redundancy, connection security and efficient power distribution.
